DETAILED ACTION

Response to Amendment

The following is in response to the amendment filed April 24, 2009.

Allowable Subject Matter

Claims 1-9 are allowed.

The following is an examiner's statement of reasons for allowance:

In a twin-wire press comprising a press frame, first and second dewatering tables supporting endless upper and lower wires and forming a wedge-shaped dewatering space in between, and a roll arrangement positioned subsequent to the dewatering tables, the prior art does not disclose or suggest a press and lift arrangement comprising a link system connecting one of the dewatering tables and the frame such that the one of the dewatering tables is vertically adjustable relative to the other in a manner that the vertical adjustment is substantially an equal distance at the front and rear edges of the dewatering tables and that the adjustment is along the entire longitudinal extension of the dewatering tables.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

Applicant's arguments filed April 24, 2009 have been considered.

In view of the arguments and amendment to the claims, Applicant has overcome the rejections of claim 5 under 35 U.S.C. 112, second paragraph, of claims 1, 2, 4, and 7-9 under 35 U.S.C. 102(b) over Santos (US 5,783,045), of claims 1-7 and 9 under 35 U.S.C. 102(b) over Sbaschnigg et al (US 6,338,773), and of claim 8 under 35 U.S.C. 103(a) over Sbaschnigg in view of Eickhoff et al (US 6,003,684). Also, by virtue of the amended claim language, the features of the present invention have been clarified. It is recognized that neither of these references, alone or in combination, teach or suggest all the features of claim 1, in particular do not teach or suggest a press and lift arrangement having the claimed link system such that the dewatering tables are separated vertically from one another at an equal distance along their longitudinal extension. The closest prior art, Sbaschnigg, discloses a lift arrangement that substantially lifts only one end of a dewatering table relative to the other. Eickhoff also discloses a lift arrangement having the same features as that of Sbaschnigg.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Eric Hug whose telephone number is (571) 272-1192.
